

NPC Schema v0.1 (Design Note)

Identity

- id (unique)
- name
- species / type
- role (crew, guard, engineer, merchant, etc.)
- faction (friend / foe / neutral)
- disposition (friendly, wary, hostile)

Stats

- health
- stamina
- armor
- level
- skills / traits (stealth, barter, engineering, etc.)

Movement

- speed
- allowed_areas
- pathing_mode (patrol / roam / stationary)
- schedule (time-based waypoints)
- can_follow_player (true/false)

AI Behavior

- behavior_set (guard, merchant, engineer, medic, etc.)
- aggression_level
- curiosity_level
- assistance_rules (when to help player or other NPCs)
- dialog_topics (keywords or topic ids)

Loadout

- weapons
- armor
- inventory (items carried)
- carry_limit
- quest_items (special flags)

Interaction

- tradeable (yes/no)
- quest_giver (yes/no)
- crafting_services (repair, upgrade)
- teachable_skills

Events / Hooks

- on_seen_player
- on_attacked
- on_item_given
- on_tick (periodic behavior updates)

Notes

This schema is intentionally minimal. We'll expand behaviors, dialog systems, combat patterns, and interaction rules later.
